

# Foldable Baby Play Mat, Folding Mat, Puzzle Mat, Roll Mat, Picnic Mat

----- Expert in baby crawling mats  
Suitable for babies and children from birth to school

Applicable Venue:  
Children's play ground, Stay at home, Kindergarten,  
Market, Camping, and etc.

# When Choosing Crawler Mats, there is also Knowledge.

Market mainstream materials: XPE, EPE, EVA. XPE, EPE is finally classified as PE, which is commonly known as pearl cotton. All the forming principles are foaming. PE foams become different products and exhibit different characteristics according to different foaming technologies.

## (1) EPE baby crawler mat

It is made of polyethylene, also known as pearl cotton, which is physically foamed. In short, it is the use of gas (which is usually butane) to make raw materials through a machine to complete the foaming work. Its product characteristics are: safe, environmentally friendly and comfortable, without any harmful substances, non-volatile, soft, insufficient resilience, easy to fold but not easy to recover. Easy to clean. The most important point: flammability.

## (2) XPE baby mat

Chemical cross linked polyethylene foaming material is made of low density polyethylene resin, cross linking agent and foaming agent through continuous foaming at high temperature. Its product characteristics are: safe, environmentally friendly, soft, no harmful substances, non-volatile, easy to recover creases, good elasticity. Easy to clean. Flame retardant to a certain extent.

Durability: more than two years. High-end car sound insulation cotton is such a thing. XPE and EPE are all covered with film, so the ink is inside the contact surface and will not contact the skin directly. So it has higher security, and the film thickness of XPE is thicker than that of EPE, so it is not easy to be punctured. EVA can not be coated, generally adding color in raw materials, making the whole is a pure color, some will print patterns on the surface, but the color will not be too much, ink directly contact the skin.

\*\*\* Performance Comparisons among EVA, PVC, EPE, and XPE material:

	EVA	PVC	EPE	XPE
<b>VOLATILES (FORMAMIDE)</b>				
<b>SOFTNESS</b>				
<b>RESILIENCE</b>				
<b>SERVICE LIFE</b>				
<b>RECOVERY</b>				
<b>WATERPROOF</b>				
<b>SMELLING</b>				<b>NON</b>

Generally speaking, XPE baby mat is recommended, followed by EPE baby mat. Both XPE and EPE play mats are considered environmentally friendly and odorless. There are also many products with imported XPE materials being sold. In fact, XPE originated in Korea, but the price is extraordinarily high, now domestic machines can also be produced. The quality is the same, and the price of the same product is saved by half. In addition, crawling mat is a wide range of household appliances, not only for babies, picnics, Yoga can also be used.

XPE is often highlighted as a safer alternative to traditional materials like EVA and PVC due to its lack of harmful chemicals like phthalates, BPA, and formaldehyde.

# Dexterous Folding Mat

## Structures

Suitable for cooling insulation all year round

----- In summer, it blocks the hot air on the ground, and in winter, it prevents moisture and cold.

## Folding Methods

## Characters:

Waterproof  
Easy to clean  
Anti-scratch  
Non-toxic

Soft Elastic  
Tear Resistant  
Alleviate the impact  
of babies during  
playing

Collapsible  
for easy storage

Concave & convex  
texture for  
anti-skidding

## Application Scenarios:

Indoor for Play, Jumping, Educational, Exercise, Yoga, and etc.

Outdoor for picnic, and etc.

## Sizes & Descriptions

Description	Material	Width*Length (cm)	Thickness (cm)
Foldable Baby Play Mat	PE, XPE	90 x 120	1.0
Foldable Baby Play Mat (Triple Folded Available)	PE, XPE	120 x 120	0.8, 1.0
Foldable Baby Play Mat (Triple Folded Available)	PE, XPE	120 x 180	0.8, 1.0
Foldable Baby Play Mat (Triple Folded)	PE, XPE	130 x 200	1.0
Foldable Baby Play Mat	PE, XPE	150 x 180	0.8, 1.0, 2.0
Foldable Baby Play Mat	PE, XPE	150 x 200	0.6, 0.8, 1.0, 1.5, 2.0
Foldable Baby Play Mat with Fence	PE, XPE	180 x 200	1.0
Foldable Baby Play Mat	PE, XPE	180 x 200	0.6, 0.8, 1.0, 1.5, 2.0

## Storage Scenarios

Folded & Stored underbed

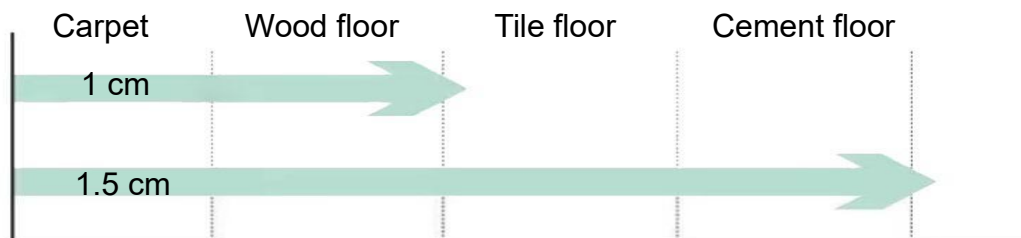

Folded & Stored in between furniture gaps

Folded & Stored under sofa

## How to choose the mat thickness ?

1cm ----- Suitable to use on carpet or wooden floor

1.5 cm ----- Suitable to use on tile floor or cement floor

High Density XPE / Non toxic EPE+  
Green Plant Ink + Waterproof PE Film

### Buying Points

1. Soft floor surface for babies and children to play on from birth to school;
2. Hygienic and safe ;
3. The cushioned surface ensures a soft landing for rolling, tumbling, and falls;
4. Waterproof and easy to clean: Wipe with a soft damp cloth for food and drink stains ;
5. Perfect for reducing noise and impact, and a great insulator on all floor surface.
6. Lightweight, durable and assembles in minutes

### Important difference between EPE puzzle mat & XPE puzzle mat:

If cost-effectiveness is emphasized and fire prevention requirements are not high, EPE puzzle mat can be selected;

If pursuing durability and safety, it is recommended to prioritize prefer XPE puzzle.
